THE SUN'S TREATMENT OF THE WATER QUESTION COMMENDED.

nre Water Would Promote Temperance -The Pilter Plan Well Spoken of, But Only as a Temporary Remedy. "It is enough to drive a man to drink," remarked a Newark Alderman yesterday, when asked what he thought of the water question. "It has driven men to drink," he continued. Look at our breweries. They turn out nearly 17,000,000 worth of ale and tager beer every year, and the greater part of it is consumed right in Newark. This is one of the chief cities in the Union for both the manufacture and onsumption of lager. I am not a Prohibitionist or a temperance agitator, but I firmly believe that a supply of good drinking water in Newark would lessen the consumption, not only of beer, but of wine and whiskey as well, and that drunkenness would be greatly reduced in the city. Look at our police records. Over twofifths of the arrests last year were made for drunkenness. I don't say the water is entirely to blame for this, but it must bear a fair share of the blame. I know scores of men and women who will not drink the water, and I do not blame them."

Alderman Eugene Ufford, an outspoken member of the Common Council, said yesterday: I read the articles in THE SUN yesterday and to-day, and am sincerely glad that the subject has been taken up and honestly dealt with, as I must say THE SUN has dealt with it. It has placed the matter before the people in a manner to attract attention and carry conviction. I am first, last, and always in favor of a new water supply, and will vote for it as long as I have a voice in the matter. I go further than this, for I believe that it will require five or ten years to build such a water system as we shall need in the future, and I believe in providing for the most remote contingencies. I am in favor of having a filtering system adopted at once and used until the new supply is turned once and used until the new supply is turned on, or after that if it is still necessary. We cannot make any mistake in this matter, for it is impossible to get drinking water too pure. We don't want any nourishment in the water. The Hyatt Filter Company proposes to build a filter for us for \$250,000, and to guarantee it to fill the bill. I say pay them \$300,000 for it if necessary, and have it understood that the total work will not cost more than \$300,000. I don't believe in estimating \$299,000 for a sewer and finding that it costs three-quarters of a million when it is completed. Such transactions weaken confidence and make people distrust everybody and oppose needed improvements."

Superintendent George R. Gray said yesterday that it was imporatively necessary for Newark to go to the mountains for water soon, no matter what the condition of the river might be to-day. "Rectories are going up along the river, and they are getting further up and nearer the water works every year. One brings another, and in turn the river front on both sides will be built up solid with mills and factories, each of which will have to discharge its refuse into the river. We cannot stop the growth of Newark. Paterson, or Passaic, and consequently we must go above them for water. We cannot buy water from any corporation at any price, for in a few years it will cost more than a public supply could be obtained for by building dams and conduits. I believe that it is a good idea to filter all drinking water. It cannot be too pure or too clean."

Mr. Gray said that the Common Council was on, or after that if it is still necessary. We

than a public supply could be obtained for by building dams and conduits. I believe that it is a good idea to filter all drinking water. It cannot be too pure or too clean. Mr. Gray said that the Common Council was not called upon to help pay for pumping water, but to make up whatever deficiency there might be in the interest account, and that the \$40,000 paid last year was for this purpose.

"Newarkers are unduly suspicious." said a prominent citizon yesterday. They think that they see the hand of John R. Bartlett, Julius Fratt, or John W. Hyatt in every agitation in Newerk of the water question. Bartlett, who is managing the West Milford Water Company scheme, has bought options around one or two lasignificant pools along the line of the Susguehanna Baliroad, and with millioraires at his back seeks to supply Newark and Jersey City with water. His lakes would not keep either city in water for washing beer glasses after the first week's drain on them. The fact of the matter is that he has got the Society of Useful Manufactures of Paterson to consent to the use of the supply at Paterson to consent to the use of the supply at Paterson falls. This society could not spare any water without prodigious indemnity if the cities wanted to take it, but in case Mr. Bartlett makes a contract with one of the cities, the society can let him have from twenty-five to seventy-five milione of gallons as day. Mr. Pratt of the North Jersey Water Company says he has purchased about three miles of the Poquannock Hiver, near Charlottesburg, and wants to dam it un and supply Newark and Jersey City with bright, clear water from this mountain atream which never runs dry. It is a tributary of the Passaic, and Mr. E. Boudinot Coult, one of the surviving heirs of the Society of Useful Manufactures, has said; He cannot do it. If he diverts any of the Pequannock River water we will be down on him with an injunction so quick that it will make his head swim. However, it is ridioulous to entertain a thought of this source, for it is inadequate a

in the Newark water supply. The plan has many advocates in and out of office, and they say it will be an economical investment under

The two largest lakes in New Jersey. Greenthe two largest lakes in New Jersey. Greenwood Lake and Lake Hopsteong: has been
abandoned, though it was seriously contemplated sew years ago, when the property could
have been purchased cheep. The reason of its
abandonment is that the engineers experiimented with its flow both summer and winter,
and said that owing to leakage and evaporation, combined with the small water-shed area
of the two lakes, the long ditle would be inadequate to supply Newark.
Water Commissioner Abram B. Staats of the
Newark Board said he read the article published in The Sun on Sunday, and was deeply
interested. In his opinion it was a fair and
inpartial statement. Tull of hard truth and de"We must have a new water supply and
most have it soon." he said. "We have plans
formulated for getting a good supply cheen
from the Passais River, near Little Falls.
There is nothing to provent it but lack of
money. Authority is wanted from the Legislature to permit us to issue bonds, but the
question arises whether the how! that our
people will raise will not kill the bill. I do not
think that we would have any trouble with the
Boolety of Useful Manufactures. I think that
the couries would sustain us against the claims
of this venerable corporation. The Newark
water Board stands in an unfortunate position in booling regarded as an in
the supplies of the standay of the standay
of the water who have a standay to meet
the indebtedness each
year. If Newark was like other crites the
water Board would be self sustaining even
with its heavy interest account. In the first
place, our water rate is less than that of any
other city with the exception of Baltimore. In
the second place, we set along without calling
upon the Fire Department from twenty
cents to a dollar per year for each hydrant we
get sothing. We do not assess preperty ownres in laying pipe into new localities, and sa
result get nothing from about two-fifths of the
account of the Fire Departments from twenty
enters the supply of

some of the water which now runs to waste over the falls. The water power people would be betteroff, as a steady supply could be assured to them at all times. They could not come into court and show damages if they received all the water that they needed at all times."

Mr. Handall's statement may be regarded as weighty, for he has given the matter thorough attention. Superintendent Gray sat at his side last evening and assented to all he said. Mr. Gray said there was nothing but the lack of funds standing in the way of a new supply of water for the city, and that the opposition from the Paterson society did not alarm anybody interested in the improvement of Newark's water. Water Commissioner Thomas Harian said that The Sun's article on Sunday was as thorough and straight in every particular as if the writer had studied the river and the water question for a lifetime. He added that there were only two ways open for getting a new supplybuying of a syndicate or bonding the city. He would never vote for a filtering system.

"The moment you take of bonding the city," he said. The people have a knife at your throat and off goes your head. I would not vote to buy water except for one or two years, and meanwhile would be building dams for and getting a public supply."

EXCITEMENT IN BASE BALL.

The St. Louis Club Selling Its Players to the

Highest Bidder. James Jackson has made application for appointment as manager of the Washington Club, with a fair prospect of success. Mr. Jackson has several New York men intercedackson has several new fork men interced-ing for him. One thing in Mr. Jackson's favor is that he is a hustler, and has done good work in bringing out young players. Dan O'Leary and Ted Sullivan are also spoken of as likely candidates for the position.

THE KANSAS CITT DEAL.
President Von der Ahe of the St. Louis Club view of arranging for the transfer of the Metro-politan franchise to Kansas City. The price asked at present is by far too great for the Kansas City men, but a reduction in the demands of the Brooklyn mon may lead to the consummation of the deal. One or two other deals in which Mr. Von der Ahe is interested is talked of.

BOB PERGUSON SIGNED.

President Byrne yesterday closed a contract with Bob Ferguson as an Association umpire for next season, and will shortly arrange with a fourth man, so that with Gafiney, Ferguson, and Doescher the American Association will possess the best staff of umpires yet seen in a championship series. Good men come high, but the patrons of the game demand them, and the demand must be supplied. PORMING THE BIG DEAL.

PORMING THE BIG DEAL.

PHILADELPHIA, Nov. 21.—President Chris Von der Ahe of the St. Louis Club arrived in this city this morning and in the afternoon he was closeted with the Athletic directors. The conference was in reference to the big deal about to be made between five of the American Association clubs. The arrangements for the transfer of two of the St. Louis players to the Athletics were made to-day. Manager Sharsig said to The Sun man: "Yes, we will have two of the St. Louis players next year, and they will be Gleuson, the short stop, and Welch, the centre-fielder. Both are good men and will greatly strengthen our team."

Mr. Sharsig refused to divulge the terms upon which the deal was to be made, but, as stated in The Sun on Sunday, McGarr and one of the Athletic catchers will probably go to St. Louis, and the Athletics will, besides, pay to Mr. Von der Ahe a handsome cash bonus. "There has been considerable talk about my team for next season," said President Von der Ahe; "there is a big deal in progress at present, but of course I cannot divulge its exact nature until it is consummated." Mr. Von der Ahe will go to New York to-morrow to complete the arrangements for the transfer of certain players to the Brooklyn Club.

BROOKLYN GETS BUSHONG. BROOKLYN GETS BUSHONG.

St. Louis, Nov. 21.—A telegram from New York to a local agent of the Brooklyn Club announces that Yon der Ahe and Byrne to-day closed negotiations for Eushong, the sale being consummated to Brooklyn for \$4,500. Negotiations are pending for the sale of Caruthers, Brooklyn, Cincinnati, and the Athletics all being biddera. Caruthers appears to have changed his mind about going into business, but is as determined as ever against playing in St. Louis. If he stays in the Association he prefers Brooklyn since Bushong's sale. He sald to-day:

prefers Brooklyn since Bushong's sale. He said to-day:
"I could get a much better salary in the League than in the Association, but it seems like I cannot get free from the latter. There is twice as much enterprise in the League as in the Association, and they treat players much better."

Private despatches from New York and Philadelphia confirm the reports of deals between Yon der Ahe and the Athlette people. Milligan, McGarr, and Mann are to come to St. Louis in exchange for Welch and Gleason and \$3,000 ench. This agreement has not been signed, but Yon der Ahe expects to close it to-morrow at Philadelphia.

workers, Nov. 21.—Manager Walter W. Burnham is organizing a strong base ball team to play here next seasoh. He to-day signed Warren H. Wheeleck, one of the strong mean on the Boston team of the last season. Wheelock will play stort stop. Bornham is confident that he has already secured a team strong enough to win the New England League championship. So far he has signed; Barry Wheeleck, short stop: Grant Briggs, catchest; E. T. O'connell, pitcher; W. R. Hamilton, left field, and John Meister, second base.

At a meeting of delegates to the American Football Union yesterday, the resignation of the Crickets of Stevens Institute was accepted. but that of the Unions of Columbia College was laid on the table. The protested game between the New York and Crescent Athletic Clubs was not passed on, but it will not affect the cham-pionship, as the Crescents have already won it, not having lost a point in the series. The final game will be between the Crescents and the staten Island Cricket Club, on the former's ground in Brooklyn next Saturday.

Women's Work in the Church.

A conference of church women with the clergy A conserence of church women with the clergy of this Episcepal disease will be held to day in the hall of the Young Women's Christian Association, 7 East Fifteenth street. Papers and addresses are expected from Bishop Potter, the Rev. Morgan Dix, the Rev. Philips Brooks, this Rev. It. S. Rainsford, and others.

Yesterday, in the Church of the Heavenly Rest, Pifth avenue and Forty-fifth street, was observed a "Quiet Day for Women." Addresses were made by Bishop Potter, and by the restor, the Rev. D. Parker Morgan, and Archdean Mackay Smith.

The heaviest locomotive ever turned out in Paterson was shipped yesterday from the Rogers works. It was for the Union Pacific Railroad and it weighed 112,000 pounds. When it is known that the heaviest freight engines with sight driving wheels weigh only 100,000 pounds and this passenger engine has only four drivers, some idea of its size may be interred.

Sporting Notes.

for a purse of \$600.

Ous Haas, the amateur prize fighter, and J. Eccles will shoot a piceon match at Dexter Park, L. L., next Thursday, 25 birds such, 25 yards rise, for \$100.

Jack Dempsey says that he will not accept any challenges from Pote McLoy and theory & Le lianche, or Denny Kelicher, until after his fight with John Reagan.

The Kings County Wheelmen will hold a paper chase on wheels next Thursday, starting from Prospect Park Plats. It will be the first of the kind ever held in the county.

The three will be the first of the kind ever held in the

The three-mile single-sculi race between John McKay of Hairlax, N. S., and Feter Conley of Fortland, Ma., for Said a side, will be rowed over the Charles River course, Boston, to day.

The third annual burlesque games of the Nassau Athletic Club will take place on the Washington Fark ground, Brooklyn, Thanksatving Day, Jack Lloyd will run S. D. Freeth five miles for a 2500 trophy.

The annual quoit tournament in the staten Island Cricket and Base Rall Club was finished yeaterday on the grounds at Livingston, S. I. J. Cutihertson won the first prise a handsome silver oup, and W. Arbuckle the second prize.

Toff Wall, the middle-weight champion of England.

the second prize.

Toff Wail, the middle-weight champion of England, after making a tour through England expects to leave for this country in the latter part of December to fight Jack Bempsey for from \$0,000 to \$2,000 a side, and the middle-weight championship of the world.

Benides a match trot for \$2,000 between Rosalind Wilkes and Reminworth, at the Driving Park Thanks giving Day, the committee of the Gentlemen S Driving this has offered a purps of \$100 tor a best three in five, mile heast trot to harness, for which Perplaced, Lowland Mary, and Genpany will race.

Official Vote of Pennsylvania. HARRISBURG, Nov. 21.—The official vote of all the counties at the recent election has been received at the State Department. The totals for State Treasurer the State Department. The totals for State Trassurer were as follows: Hart (Rep.), \$95,514; McGran (Dem.), \$41,200; Irish (Fro.), 18,471; Kennedy (Labor), 8,180, Hart's plurality, 40,243, Total vote, 753,150. The vote for Judge of the Supreme Court was as follows: Williams (Rep.), 382,267; Thompson (Dem.), 343,042; Chase (Fro.), 16,921; Keyser (Labor), 8,475. Williams's nurality, 40,-215. Total vote, 753,054. There were 1,631 scattering votes this year.

But Being Knocked Senseless by a Foul Blow He Gets the 51,000 Stakes. One of the gamest fights seen in this vicinity in some time, occurred early last night between George McArthur of this city, known as the middle-weight champion of Montreal, and Jim Donnelly, the cowboy pugilist from Kansas. Donnelly's friends, to introduce their favorite to the sporting men of the East, had arranged a fight to a finish. Police Gazette rules, with McArthur for \$500 a side with skin gloves. There were thirty-two spectators including five or six from Kansas, and the rest from New York and Philadelphia. After falling to find a York and Philadelphia. After failing to find a place in Trenton for the fight, a barn in Rahway was secured and the men with their friends went to it by devious ways after nightfall. MeArthur, who is 5 feet 10 inches tall. weighed in at 155 pounds. Donnelly, who is exactly of McArthur's height, weighed 160 pounds.

DOUNGS.

First Reund—McArthur galloped around his opponent for a long time, accomplishing nothing, and then suddenly reversing hiestep, landed a terrific right-hander on Donneity's jaw, knocking him down.

Second Round—Donneity led, was stopped, and got a counter on his left ear. McArthur led and slipped, whereupon Donneity gave him a stinger over the left eye that raised a red blotch and made the Kanaas cowbors whose. boys whoop.

Third and Fourth Rounds—McArther laid for Donnelly's wind and got in several telling blows on his stomach and rice and received but little punishment. The fourth round was a repolition of this one, except that in it McArthur completely closed Donnelly's eye with a single Arthur completely closed Donnelly's eye with a single right-hand how. Donnelly, whose pluck was unmistaked by the complete of the complete which are several fashiures successed in getting is a smashing blow on McArthur's nose. The blood spuried in all directions at first marking a good part of McArthur's face with radiating streams, but these soon spread until the face was horrible to look en. McArthur was furious, and made an onslaught on Donnelly that was not effective.

Might Bound—McArthur landed lightly on Donnelly sight eye, heavily on his stomach, and heavily again on his left ear, all in rapid succession. Donnelly was knucked down. He got up game, but caught one on the mouth that drew blood and another on the stomach that made him groan.

neily as, fortunately for him, an secondary and have it.
Tenth Round—Donnelly come up very groggy and nearly blind. McArthur lad with his left, cauching Donnelly was the nearly blind. Who will his forearm. Formelly was knocked to the complete was a terrific jaw storm; McArthur wanted to whip the referee, but the decision stood.

WILKESBARRE, Nov. 21 .- James Dillon, a noted pugilist of Kingston, and an unknown, said to be a Welsh' man residing at Danville, fought twenty-one rounds at Maitby, this morning, for a purse of \$200. The fight was awarded to Dillon, who severely punished his opponent.

The week opened upon the Stock Exchange with a quiet market. Speculation was partially checked by a revival of aggressive tacties by the bears. The prevalent theory in the street is that the sharp advance of a week ago, together with the substantial character of the market, invited quite a little realizing which the advocates of lower prices are now endeavoring to turn to their own account. To an extent they are undoubtedly doing just what ably being aided, negatively, at least, by the larger operators who are in favor of higher prices ultimately. The reaction, for the downpoint of time or in prices the limits of a reac-tion, enables the sellers of last week to recover their lines and further encourages their opponents to remain in the market. This last is important, in that it gives life to the speculation and also imparts a certain element of Despite a very indifferent market in London

and an absence of foreign interest here for the moment the market opened generally strong. The coal stocks and Richmond Termiwere the features of strength, and the efforts to depress prices which were the feature of the day's trading failed to wipe out all of the early improvement recorded in these stocks. They were exceptions in closing higher, while the remainder of the list sustained fractional losses. The bear attacks centred in the Granger stocks and in Reading. The last named was conspicuously firm throughout, giving no indications that it would relinquish its place as the leader in the current speculation. The advocates of lower prices tried to start a discussion relative to the money market, and late in the day bid the rate for money up to 6 % cent. The attitude of the Treasury Department is so unmistakably shown by the continuous large deposits of Government lunds in the national banks that it seems idle at this time to pay any attention to the misleading predictions of those who are short of stocks. Aside from the policy of the were exceptions in closing higher, while the remainder of the list sustained fractional Government funds in the national banks that it seems idle at this time to pay any attention to the misleading predictions of those who are short of stocks. Aside from the policy of the Treasury department, the disbursements of the Government thus far this month are largely in excess of its receipts, and already warrants have been drawn for about \$17,000,000 for pensions payable early in December. Of course the Government interest payments of Dec. 1 and Jan. 1 must not be lost sight of in calculating upon the supply of money that will be available for the purposes of trade.

There was practically a dearth of news today. The few developments were favorable, including the declaration of the usual quarterly dividend of 2 w cent. by the Chicago, Burlington and Quincy Company. This fact, together with the carrying of \$150,000 to surplus account after paying the dividend, is not calculated to encourage those who expressed their belief in lower prices by selling the stock of the company short considerably below present figures.

In the Unlisted Department there were deal-

of the company short considerably below present figures.

In the Unlisted Department there were dealings in Cotton Oil Trusts at 32% to 81%; Georgia Pacific 2s soid at 51; Mexican Nutional 1st. trust certificates. at 41%; Pensacola and Atlantio at 8%; Western National Bank at 95% to 96; Kingston and Pembroke Iron Mining at \$2,50 to \$2.62%, and Sutro Tunnel at 27 to 31 cents 7 share. The market closed quiet and featureless.

Final prices compare with those of Saturday as follows:

Nov. 18, Nov. 21.

Nov. 19, Nov. 21.

cent., to 51.

Money on call 4@5 % cent. with exceptional loans at 6 % cent.

Sterling exchange was a little firmer. There is a fair demand, but the higher rates to-day were due chiefly to a scarcity of commercial bills. Posted asking rates were advanced % a cent % pound, to \$4.82%@\$4.83 for long bills and \$4.86% for demand.

Tesanyry halances, by to-day's statement. Treasury balances, by to-day's statement:

Totals. \$772,785,618 \$223.018,566 Silver balance, \$54,628,819, against \$55,052 038 Satur-day. Deposits in national banks. \$12,028,513. The Government receipts during the present month amount to \$20,685,346, and the expenditures to \$25,349,640, showing a deficiency of \$4,664,590. The expenditures include the payment of \$18,283,747 on account of pensions.

section of \$18,283,747 on account of pensions.

It will not reflect any too creditably on the trunk lines to-morrow if they fail to deal squarely and sternly with Mr. Hickson of the Grand Trunk. It will not do to let that gentleman play the Baltimore and Ohio game of cutting rates to pieces because he is an alien, and not subject to the working of the Inter-State Commerce act. The sooner he is "stopped" as Mr. Sullivan would say, the better. It lies with Messrs. Denew. Sloan, and King. and they can strangle the Grand Trunk politely and effectively in Buffalo, and put it promptly where it can do no further harm. We hope they will do it.

We have received a copy of a pamphiet circular issued to the stockholders of the New York and Boston Rapid Transit Company. It reminds us painfully of the prospectuses and circulars of the late lamented West Shore Ballroad Company. The Transit Company proposes to spend \$40,000,000 in building a railroad from Fifty-plinth street and Eighth avenus in this city, to the Boston and Lowell Ballroad station in Boston, and its promoters promise interest on double that sum. The scheme does not look well, even on paper.

Baltimore and Ohio Bailroad to-day the following directors were elected: James Sloam, Jr., Charles F. Mayer, James L. McLane, William Keyser, William Y. Burns, Robert Garrett, J. Harrison Garrett, James Carey Coale, George W. Dobbin, John Gregg, George A. Von Lingen, and Decatur H. Miller. The three first named represent the New Jork and London syndicate that has undertaken to financier the company. The report of the President shows the revenue of the past year to have been \$20,059,035, an increase of \$2,236,598 over the preceding year. The earnings of the main stem were \$11,201,348, and the expenses, 48,858,004, leaving a net balance of \$4,243,343, The working expenses were 61,22 Y cent. of the grossa earnings. The profit and loss account shows an increase for the past flacal year of \$36,258. It will be seen by this account that the surplus fund, which represents invested capital derived from net earnings, and which is not represented by either stock or bonds, now amounts to \$48,085,720.01. The Washington branch shows an increase in net earnings of \$57,035, while the expenditures show an increase of \$1,975.

crease of \$1.975.

The statement of the Cœur d'Alene Railway and Navigation Company for October shows: Grossearnings, \$18,034; not earnings, \$9,689; and from April 1 to Oct. \$1: Gross earnings, \$10,411, and not, \$65,609. Paris advices quote 3 F cents at 80.42%, and checks on London 25.33,
